

# 3" Float Engineered Panel Clip

## Application

Standing seam panel clips used for attachment of mechanically seamed panel types wherein movement of the roof panel system is required to allow for thermal expansion and contraction

## Features and Benefits

- Manufactured from high quality, corrosion resistant steel meeting strict mechanical property requirements
- Tightly controlled manufacturing tolerances for a secure and functional fit every time
- Allows limited thermal movement (determined by length of slide between the clip's top and base). Always follow the standing seam panel manufacturer's details and instructions on proper use, location and performance values of float clips as well as properly fixing of roof panels to the structure to prevent uncontrolled sliding
